AVA Trade World Ltd. DT Direct Investment Hub Ltd. is regulated by the Cyprus Securities and Exchange Commission (No. 347/17)

What Is Crypto Gaming

While virtual video game money is not a new concept, the advent of blockchain technology has created opportunities for crypto gaming developers to add an element of real-world economics to their games.

Crypto gamers can earn non-fungible tokens (NFTs) or cryptocurrency by playing and winning a game, and those digital assets then become the property of the gamer. In many cases, in-game digital tokens can be exchanged for stable coins on either centralized or decentralized cryptocurrency exchanges.

What Is Cryptocurrency Wallet

A cryptocurrency wallet is an application that functions as a wallet for your cryptocurrency. It is called a wallet because it is used similarly to a wallet you put cash and cards in. Instead of holding these physical items, it stores the passkeys you use to sign for your cryptocurrency transactions and provides the interface that lets you access your crypto.

Modern cryptocurrency wallets make the blockchain accessible to everyone. When cryptocurrency was first introduced, sending cryptocurrency was a manual task that required entering long keys. Today, the software does most of it for you.
